

Distilling PostScript Files:
Adobe Acrobat Distiller 3.0 - PC

- With Distiller launched, go into
Distiller > Job Options...

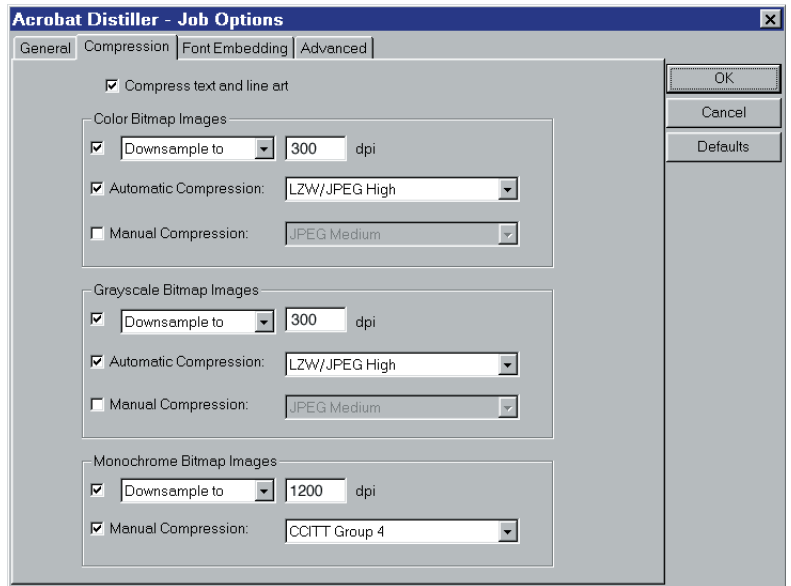

- Under the **General** Tab,
match example to the right.

Note: The Default Page Size depends on the size of your document and how much bleed you have assigned. Make sure that nothing is cut off in the PDF file.

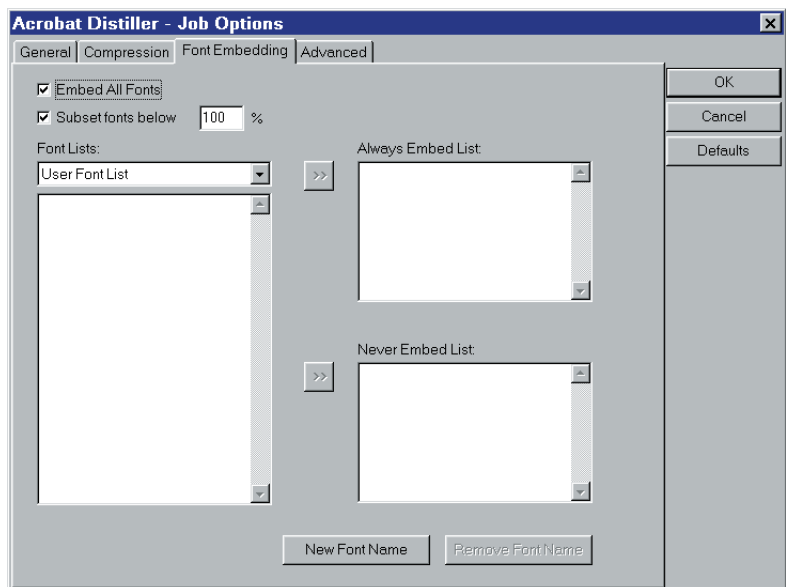

- Under the **Compression** Tab, match example to the right.

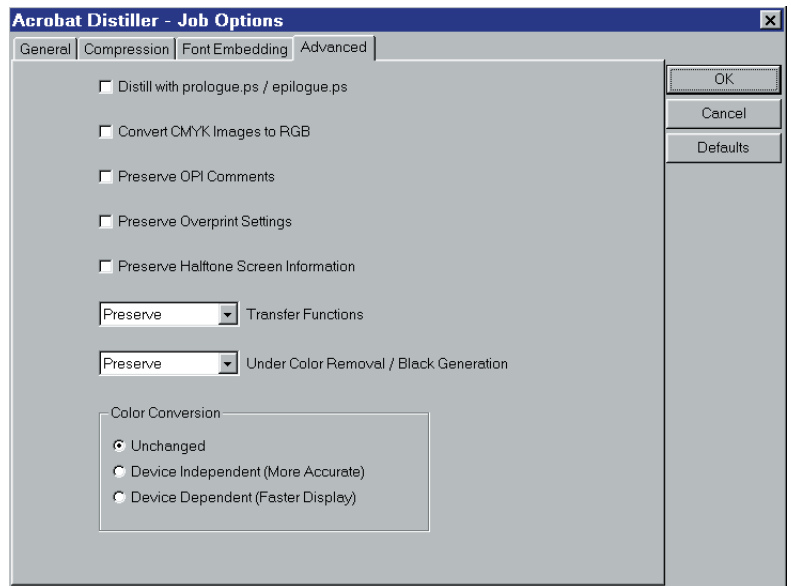

- Under the **Font Embedding** Tab, match example to the right.

Note: Fonts must be embedded.

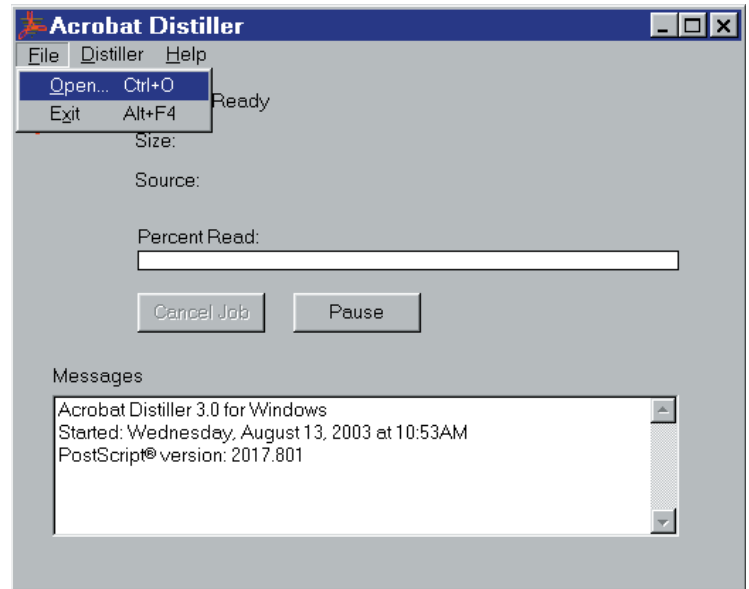

- Under the **Advanced** Tab,
match example to the right.

*Note: The Color Conversion must
be set to Unchanged. If your settings
do not match these settings, a color
profile may be assigned and this can
result in color separation other than
what you expected.*

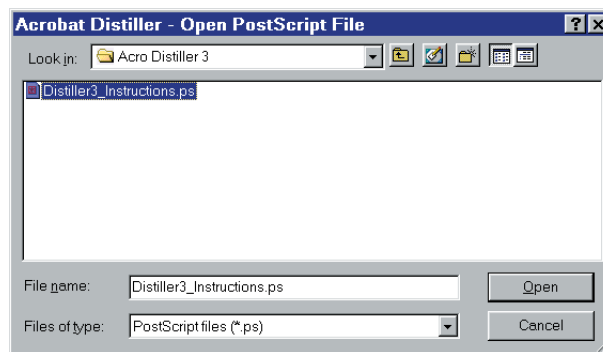

- To distill your PostScript file, go into **File > Open...**

- Navigate your way to the .ps file that you wish to distill.

- Click **Open**.

- Click **Save**.
